

What is This Is Not MLM?

This Is Not MLM?

Be it MLMs or any work from home opportunities, getting help from experienced people HELPS you a lot because you can have an accurate and deep understanding of it.

As always, any new opportunity you see online, always go through the reviews so that you can make the right decision. ((: <http://10provenwaysonline.com>))

What is This Is Not MLM?

This Is Not MLM is a new business opportunity that I found a few weeks ago, and I thought I want to review This Is Not MLM program for people who are searching for a legit review. I'll walk you through what it is and how you'll make money!

((: <http://10provenwaysonline.com>))

Company name: **This Is Not MLM**
Site name: <http://10provenwaysonline.com>

Payment method: Weekly PayPal payment
Investment cost: \$125

Founded date: 2018

Program type: Affiliate program (Member to Member)

How This Work´s!

This Is Not MLM is not a free program, and you pay \$25/month for the admin and then another \$25/week for the member who invited you. Each member who starts becoming a paid member you'll earn \$25 from your referral every week. Very cool Huh!

There is no rocket science behind this. Follow the training on how to get leads and traffic, you will then know how to get more people signed up, (you'll make money.) Having said that, the potential to make money even \$5000 is not that hard.

((: <http://10provenwaysonline.com>))

Assuming you joined **This Is Not MLM**, and brought 50 people who'll actually pay you weekly so making \$5000+ in a month is certainly possible. This Is Not MLM is a very simple platform where you just get signed up and earn easy direct PayPal payment every week.

Additionally, you have training materials which teach you how to get traffic, bring people and create a Facebook account too. The Facebook script – This Is Not MLM gives you a FREE script, with the help of that you would be able to get 5000 fans in less than 30 days. How many people have a Facebook account with 5000 members?

So This Is Not MLM is what I call, "**Easy to start program,**"
